

Amazon Stock Deep-Dive & Q4 Readiness

13 June 2026 · Live Amazon (FBM) catalogue · 596 copies / 242 ASINs / £7,672 capital

Bottom line: margin and pricing are healthy and *not* holding you back. The single issue is **dead capital** — 56% of your Amazon stock value (£4,326) sits in ASINs that have never sold. Two causes: genuinely **dead-demand** sets, and good-demand sets where your merchant-fulfilled offer is **buried under 15–47 competitors**. The Q4 lever is visibility (FBA / winning the buy box) and clearing the dead tail — not cutting prices.

Scorecard

242 LIVE ASINS (596 COPIES)	£7,672 COST CAPITAL TIED UP	136 NEVER-SOLD ASINS · £4,326	~195k MEDIAN BSR (SLOW)
26% BUY-BOX WIN RATE	55% LISTINGS LOSING THE BUY BOX	£18,274 NET PROFIT, LAST 12 MONTHS	29.5% AVG MARGIN (39 LOSSES, – £124)

“Never sold” measured over your full Amazon order history (since 31 Jan 2025, ~17 months) — see *Data window* below.

The reframe — two focus areas are non-issues

FOCUS AREA	VERDICT	EVIDENCE
Stock selling at poor margin	NOT A PROBLEM	29.5% avg margin; only £124 of losses across 1,459 sales
Stock close to but not winning buy box	NOT A PROBLEM	Zero listings priced above buy box — when your offer is seen, you're at/below it
Stock listed but never sold	THE CORE PROBLEM	136 ASINs / £4,326 = 56% of capital, never sold

Most never-sold ASINs have never sold on *any* channel; a small number sell on eBay/BrickLink but not via Amazon — genuine channel-specific failures.

Why it doesn't sell — and where the £4,326 sits

SEGMENT	ASINS	CAPITAL	WHAT IT IS	ACTION
A · Buried (has demand, BSR ≤50k)	~19	~£848	Good sellers, but you lose the buy box / sit under 15–47 offers	Win where winnable; else route to eBay/BL or FBA
B · Slow (BSR 50–300k)	~46	~£1,030	Weak demand	Light markdown; don't reorder
C · Dead (BSR >300k)	59	£1,828	You match buy box but nobody buys	Liquidate to free Q4 cash
D · Junk / non-LEGO	1	£482	<i>Strictly Briks</i> generic bricks (B01K37SXH6), 82 copies, 0 sales	Dump / bundle; stop buying non-LEGO

Quick-win list — real demand, not selling (BSR ≤ 50k)

“Buy box = none” means no buy-box holder exists → a sharp FBM price can **win it**. Very high offer counts = clear off-Amazon instead.

SET	COPIES	COST	DAYS	BSR	BUY BOX	OFFERS	READ
-----	--------	------	------	-----	---------	--------	------

ARC-170 Starfighter 75402 · Star Wars	1	£30	450	1,833	£44.99	38	Hot, buried 15mo (sold just 1 in Mar '25) — relist competitively / clear
Karaoke Music Party 42610 · Friends	1	£6	103	1,970	£20.74	27	bb > 90-day avg; undercut to ~£18

~£1,000 in just these 8. Clearing the full BSR>300k tail recovers ~£1,828 for Q4 reinvestment.

Q4 restock signal — proven velocity (last 180 days)

SET	SALES	AVG SALE	PROFIT/UNIT	180D PROFIT
-----	-------	----------	-------------	-------------

Miles Morales' Mask 76329 · Marvel	24	£47.56	£22.06	£529
The Eiffel Tower ★ 21019 · Architecture	11	£120.10	£58.45	£643
Darth Vader (buildable) ★ 75111 · Star Wars	12	£70.23	£27.70	£332
Jane Goodall Tribute 40530 · Promotional	13	£39.38	£17.25	£224
Valentine's Day Box 40759 · Seasonal	20	£25.16	£7.47	£149
Winter Holiday Train 40700 · Seasonal	14	£34.65	£10.06	£141
Monster Jam Dragon / Monster Mutt 42149 / 42150 · Technic	12 / 13	~£26	~£9	£132 / £85

Pattern: **40xxx seasonal/promo** = volume (thin margin, good cash-flow); **marquee sets** (Eiffel Tower, Darth Vader) = the profit. Stock both ahead of October.

Strategic recommendations for Q4

- Decide on FBA for a curated range.** 55% of listings lose the buy box and saturated FBM offers won't convert in a Prime-heavy Q4. Send proven sellers (Miles Morales' Mask, Eiffel Tower, Darth Vader, Jane Goodall) plus the buried high-value Coruscant Guard Gunship (75354) to FBA to win the Prime buy box — only where margin absorbs FBA fees + storage.
- Clear the dead tail now (~£2.3k).** Liquidate the BSR>300k stock (£1,828) and the Strictly Briks junk (£482) via eBay/BL/Vinted/bundles. Recovers cash to reinvest in Q4 winners.
- Win the free wins.** ~44 listings have *no buy-box holder* and ~36 have ≤3 competitors — audit and price these to win. No FBA needed; pure upside (e.g. 42164, 75390, 72040, 10931 above).
- Restock velocity before October.** Depth on 40xxx seasonals for volume; Eiffel/Darth Vader class for margin.
- Don't chase price.** Margins are healthy (29.5%) and you're never above buy box. Reflexive markdowns would erode the one thing that's working.
- Purchasing discipline.** The £700+ frozen in dead Architecture sets (UN HQ 21018, Guggenheim 21004) and the £482 non-LEGO bricks were avoidable — check BSR before buying high-value or non-LEGO.
- Data fix (repeatability).** The pricer never captures live quantity and only samples your price; ASINs aren't yet on historical order lines' fee data. Capture quantity, FBM/FBA channel and the buy-box holder daily so a dashboard can auto-flag “buried” and “dead” stock.

Suggested 4-week run-up

Week 1 — List the liquidation tail on eBay/BL; dump Strictly Briks. Free ~£2.3k.	Week 2 — Audit the 44 no-buy-box + 36 low-comp listings; reprice to win. Decide FBA shortlist.
Week 3 — Ship FBA shortlist; route saturated items to secondary channels.	Week 4 — Place Q4 restock orders on velocity + margin sets.

How “never sold” was measured · Data window

At the **ASIN level** from `inventory_items` (one row = one physical copy): currently-listed Amazon ASINs (`status='LISTED' + amazon_asin + listing_platform='amazon'`) matched against every ASIN that has **ever appeared in your Amazon order history** (`order_items.item_number`, which carries the ASIN, joined to `platform_orders`). “Never sold” = a listed ASIN that never appears in that order history.

The first pass used the inventory-linked sales window (from ~9 Jan 2026 only). Extending to the **full raw Amazon order history already in the system (back to 31 Jan 2025, ~17 months)** reclassified just **8 ASINs** from “never sold” to “sold” (139 → 136) and barely moved the dead-stock capital (£1,863 → £1,828) — so the conclusions are unchanged. Data before Jan 2025 (and beyond Amazon SP-API's ~24-month retention) isn't retrievable, but given the negligible shift it would not change the picture.

Caveats

- It's Amazon-specific; a few never-sold-on-Amazon sets do sell on eBay/BrickLink.
- BSR is a point-in-time rank — treat bands as demand tiers, not exact velocity.
- Margin uses a flat £3/£4 postage estimate; large/heavy sets cost more.
- Competitive data is fresh (234/246 live ASINs priced ≤ 2 days ago); `platform_listings` is a March snapshot used only for cross-checks (21 live ASINs showed "Inactive" there — worth a Seller-Central listing-health pass).
