Sold/90d = number of times this set sold on Amazon (any seller) in the last 90 days, from sales-rank jumps — Tier A averages ~once a month or less, and those sales go to Prime/FBA sellers, which is why your FBM copies haven't moved. **Ref £** = current Amazon buy-box (a relisting reference, not a target). High-value Tier-A picks worth an FBA test: adidas Superstar 10282, Dragon of the East Palace 80049, Guggenheim 21004, Windmill Farm 21262.
